SUBJECT: JTA SYSTEM VERSION 4.31 RELEASE

The purpose of this information bulletin is to inform you that the Workforce Investment Division (WID) will release the Job Training Automation (JTA) System Version 4.31 on the weekend of March 26, 2004. This release includes an addition to the Enter Systems Function Table Screen (ESYS). The release adds the Standard Occupational Classification (SOC) codes and permits entities moving from Occupational Employment Statistics (OES) codes and Dictionary of Occupational Titles (DOT) codes to use a new code without revising all previously entered data. Those changing code types should select the combination of their old code and their new code in the ESYS screen. The JTA system software will be available beginning Monday, March 29, 2004. A detailed description of the software changes is attached.

Note To Timeshare JTA System Users—This release will be installed over the weekend. Please do not access your system from Friday, March 26, 2004, at 6 p.m. through Monday, March 29, 2004, at 8 a.m.

Note To Standalone JTA System Users—The release files will be available on Wednesday, March 31, 2004, on the FTP site at endor.jta.edd.ca.gov and on the timeshare server at jta.cahwnet.gov.

The new programs and enhancements are a result of program requirements and calls made to the JTA Help Desk.
